# Requirements and Design Document

**Project Name:** [provide a name for your project]

## Project Overview:

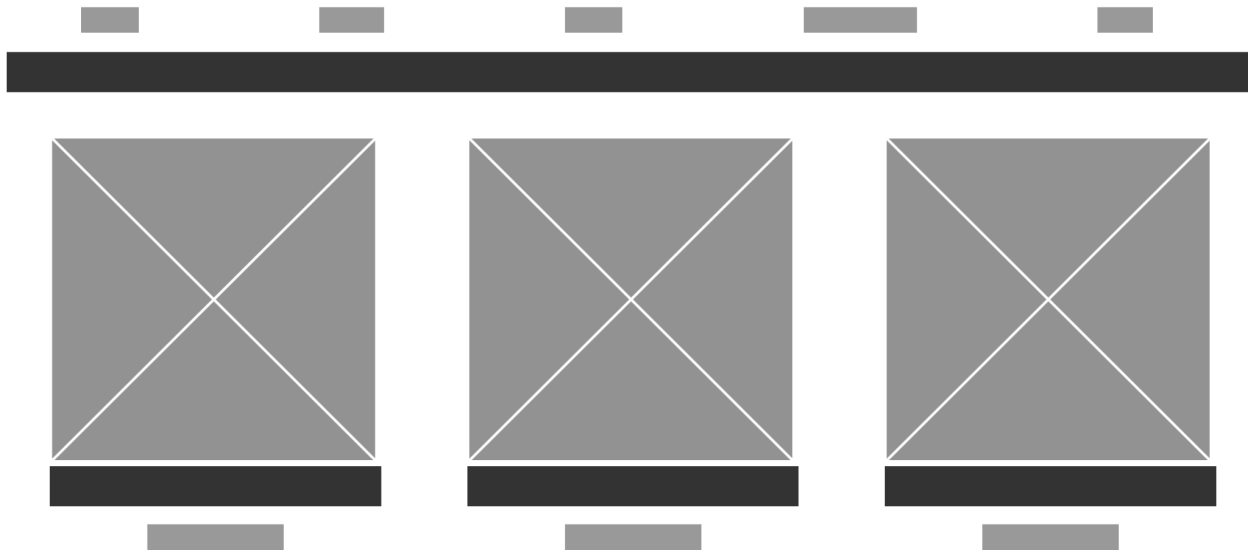

- This site will act as a personal art portfolio that displays the pieces that I've created over the years
- Site will include a full page hero with button that leads to gallery
- Gallery will display portraits and allow user to fullscreen the img when clicked on
- About page giving summary about website
- Page to display youtubers that inspired my work. Give link to youtube page
- Contact page that leaves my emails, and socials for people to contact me

## Client Information:

- Jaylon Carrington
- Freelancer
- carringtonjaylon4@gmail.com
- 908-380-6702

## Wireframe:

- Wireframe includes black bar that represents navbar. gray rectangles show how i want each nav-item spaced. (Evenly and centered)
- General layout of pages will generally follow a giant block for imgs or cards along with a button. If I were to add more card blocks to the page, it will wrap after 3 blocks and continue in the next available space.
- Simple wireframe with no dropdowns. Only links used are hyperlinks

# Requirements and Design Document

## Site Map:

- User starts at Main Page
- All pages use Header/Footer components.
- Card and Hero img reused for imgs to display title, description and link
